Driving Sustainability & Compliance in your Supply Chain

Whitepaper
The Challenge

Companies are being held accountable for the practices of their suppliers

With the rising tide of regulatory and social media becoming more and more powerful, procurement must be prepared to operate with complete transparency. Sustainability and compliance performance will become fully visible and procurement will be held accountable for the social, economic and environmental impact of their suppliers.
The Solution

Pre-built supplier self-assessments & real-time social media monitoring

The cloud-based platform integritynext.com covers all major aspects of Corporate Social Responsibility (CSR) and sustainability requirements, allowing companies to instantly monitor thousands of suppliers with minimal administration. The platform brings together pre-built supplier compliance assessments and real-time social media monitoring in a user-experience driven solution that covers international standards and extends multiple tiers into the supply chain. With this your suppliers commit their good corporate practice and get monitored with Social Media Analytics.

Anti-Bribery & Anti-Corruption
Measures your suppliers undertake to combating corruption, bribery and antitrust violations

Health & Safety
Measures your suppliers undertake to ensure occupational safety, health protection and security

Trading Partner Security
Check whether your suppliers are a member of customs’ initiatives for trading partner security such as C-TPAT and AEO

Environmental Protection
Policies and procedures by your suppliers to conserve natural resources and preserve natural environment

Supply Chain Responsibility
Commitments of your suppliers to ensure economical, ecological and social responsibility in their supply chains

Information Security
Measures your suppliers undertake to safeguard data from unauthorized access and modification

Human Rights & Labour
Engagements of your suppliers to avoid forced and child labour, to eliminate discrimination and to ensure good working conditions

Blacklists & Sanctions
Cross-check of your suppliers' board members and beneficial owners with international sanctions and denied parties lists from EU, FCPA and OFAC

Conflict Minerals
Measures your suppliers undertake to ensure conflict-free sourcing of 3TG and declaration of conflict minerals in your products.
How it Works

3 simple steps towards supply chain sustainability

Many companies struggle with transforming sustainability requirements from international regulators into processes and systems. IntegrityNext relieves them from these hurdles with a ready-made solution adhering to international standards. IntegrityNext dramatically reduces the effort for assessing and monitoring suppliers so that companies can highly extend the reach of their supplier vetting process. This allows them to not only cover the strategically important suppliers and the suppliers with high spend volume, but also their tail-end suppliers, indirect spend and sub-suppliers. It just takes three simple steps to get started:

1. Register at IntegrityNext
2. Upload your suppliers
3. Your suppliers get invited

**Supplier Self-Assessments**
Your suppliers perform self-assessments and confirm their compliance with sustainability standards and uploading their certificates.

**Social Media Monitoring**
IntegrityNext scans more than 600 million messages every day to ensure you know first about reputational threats caused by your suppliers or their supply chain.
